

Jobtoolz – DevOps Engineer Partner Awards

DevOps Engineer with a passion for scalable cloud solutions.

Do you have the AWS skills we can only dream of? Do you have an eye for security, performance, and automation? And do you want to contribute to an amazing developer experience? Check off all the boxes below? Then don't hold back—apply now!

You build and maintain our hosting infrastructure. With tools like Terraform and Ansible, you make sure our entire environment runs like a Swiss watch.

You elevate our performance to new heights. With monitoring tools, you spot bottlenecks faster than you can say "latency." Together with the dev team, you turn our user experience into a lightning-fast ride with no hiccups.

IAM, firewalls, and compliance are second nature to you, just like ping-pong is to our team (and yes, you always win).

You tinker with pipelines like they're Lego, and CI/CD is your playground. Build, test, improve—you're the one ensuring smooth releases that keep getting better.

Problem spotted? You've got the solution ready before anyone even says "help." Monitoring is your sixth sense, and downtime is your greatest enemy.

You're the rock in the storm. Whether it's solving hosting issues, fine-tuning workflows, or sharing knowledge, your colleagues can always count on you.

De DevOps Engineer of our dreams ...

... has AWS in their blood – from EC2 to S3, and from Lambda to VPC, you know it all!

... is skilled with tools like Terraform, Ansible, and CircleCI.

... has a sharp eye for security, monitoring, and cloud optimization.

... has knowledge of PHP & Javascript (but it's not a must).

... is eager to grow – both with us and in your personal development.

... is a communication talent in both Dutch and English.

What's in it for you?

- A wage of course!
- A training budget to further develop yourself professionally and map out your own career path.
- We don't have a cafeteria, but we do have a cafeteria plan.

- Meal vouchers and eco vouchers.
- The most comprehensive & innovative hospitalisation insurance that also covers outpatient expenses.
- Up to 31 holidays to spend enough time with your family and friends.
- A laptop (du-uh)
- A hybrid working environment with sliding hours.
- Team activities. A lot. A lot.
- Team talks on Fridays with unlimited access to our Jobtoolz booze bar.
- An unhealthy dose of competitiveness over a fierce game of ping-pong or darts.
- Treats à volonté from our (bad) losers after such fierce games.
- An A-team with goodies to go for it every day.

Got an appetite?

Send us your CV, cover letter, criminal record extract, your national register num....

Just kidding!

All you have to do is click 'apply' and blow us away with your thrive and passion for the DevOps Engineer job.
We'll get the coffee ready in advance.

See you soon!
